Secure Access with Azure
Active Directory

Identity Protection and
Governance

Implement Platform
Protection

Secure Your Applications

Secure Your Data at Rest

Manage Security Operations

Capstone and Practice Exam
(AZ-500)

Aug 7, 2025

Arrian Munsod

has successfully completed the online, non-credit Professional
Certificate

Microsoft Azure Security Engineer Associate (AZ- 500)

This program covers concepts aligned with the AZ-500: Microsoft Azure Security Technologies certificate exam. By completing this program, the student has gained proficiency in managing user identities, safeguarding the platform, securing applications and data, and managing security operations. They have gained knowledge of Azure tools and services such as Active Directory, DDoS Protection, Firewall, Kubernetes Service, Key Vault, Resource Monitor, and Monitor Application Insights. They have also gained knowledge of Microsoft tools and services such as Identity Platform, Defender for Cloud, Graph, and Sentinel.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
